ABOUT ME

I am an Artificial Intelligence & Machine Learning student with a strong interest in building intelligent, real-world solutions. I have hands-on experience developing projects in computer vision, data analysis, and application design, including a Theft Detection System, Trip Planner, and Student Performance Analysis. I enjoy solving practical problems using technology and continuously improving my technical skills.

EDUCATION

2024-2028	Bachelor of Technology in Artificial Intelligence & Machine Learning L.D. College of Engineering (LDCE), Ahmedabad 2nd Year (3rd Semester) SPI: 9.37 Focused on AI, Machine Learning, Data Structures, Web Development, and Database Management. Gained hands-on experience in building AI-assisted applications and web projects.
2023-2024	Higher Secondary Education Percentage : 97.67 Completed with specialization in [Science / PCM]. Developed strong foundation in mathematics, physics, and programming concepts.
Gujarat Technological University	
Sahajanand Vidhalaya	

SKILLS

- Programming language : C, C++, Java, Python
- Libraries: Numpy, Pandas, Matplotlib, Seaborn, Opencv
- Web Technologies: HTML, CSS, JavaScript, Flask
- Databases: MySQL, Oracle
- Tools: Git, GitHub, VS Code, Jupyter Notebook, Google Colab
- Soft Skills: Problem-Solving, Logical Thinking, Communication, Teamwork,

PROJECTS

Theft Detection System

Developed an intelligent surveillance system using Python and OpenCV to detect suspicious activities. Implemented computer vision techniques for real-time monitoring and anomaly detection. Designed automated alert logic to improve security response efficiency.

Trip Planner App

Developed a web-based Trip Planner using HTML, CSS, JavaScript, Flask, and MySQL. Implemented features for destination selection, itinerary scheduling, and route organization. Designed backend logic and database integration for efficient trip data management.

CERTIFICATIONS

Google Cloud: Prompt Design in Vertex AI – Gained hands-on experience in crafting effective AI prompts for various real-world tasks.

Build Real-World AI Applications with Gemini and Imagen – Developed skills in applying cutting-edge generative AI tools for practical use cases
